# Ideation Phase

## Brainstorm & Idea Prioritization Template

| Date | 10 October 2022 |
|---|---|
| Team ID | PNT2022TMID35628 |
| Project Name | University Admit Eligibility Predictor |
| Maximum Marks | 4 Marks |

## Step-1: Team Gathering, Collaboration and Select the Problem Statement

## Step-2: Brainstorm, Idea Listing and Grouping

### Surya R

| | | |
|---|---|---|
| Watch tutorials learn ml | required virtualization tools | fast prediction ml predictor |
| provide : user login, my library etc | add details on how we predict | rebuild from existing solutions |

### Rangaraj Praveen

| | | |
|---|---|---|
| let's learn most used ML and AI algo | let's learn most used Data visualization | provide service like "within budget universities" |
| add college recommendation system | deploy using cloud-fast and scalable | |

## Bhairav AJ

- collect new data's from users and implement a model
- build new predictive model with accuracy
- analyze existing apps/web services of such predictors
- present results in understandable visual
- for students thinking to take University provide guide "how to select uni."

## ChandraTeja Reddy

- let's make app-anywhere and anytime useability
- add message of "areas of improvement" or "how to raise chance..."
- add additional content blogs
- show comparative chart of marks
- show requirements vs users mark graph

③

**Group ideas**

Take turns sharing your ideas while clustering similar or related notes as you go.
In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger
than six sticky notes, try and see if you and break it up into smaller sub-groups.

🕐 20 minutes

### Requirements

- watch tutorials - learn ml
- required visualization tools
- let's learn most used ML and AI algo
- list most used ml and ai algo
- collect new data's from users and implement a model
- analyze existing apps/web services of such predictors
- deploy using cloud-free and scalable

### Application Type

- learn web dev and frameworks
- lets make app - anywhere and anytime useability

### Core Features

- fast prediction ml predictor
- present results in understandable visual
- provide web service with predictor for both students and teachers
- provide necessary links to recommended colleges
- provide user login, my library etc
- show requirements vs users mark graph

### Additional Features

- add location based predictions too
- provide service like "winning budget" universities
- for students thinking to take University provide guide "how to select uni."
- add details on how we predict
- add message of "areas of improvement" or "how to raise chance..."
- add additional content - blogs

### Extras

- rebuild from existing solutions
- show comparative chart of marks
- add college recommendation system
- provide "sop" editor

**4**

## Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

♡

**Importance**

If each of these tasks could get done without any difficulty or cost, which would have the most positive impact?

⚑

**Feasibility**
